## **Agradecimentos**

Agradecemos a todos que contribuíram no desenvolvimento deste projeto. Principalmente, aos professores do Curso de Desenvolvimento de Sistemas da ETEC Albert Einstein, que contribuíram e nos ajudaram no nosso desenvolvimento.

## RESUMO

Sob a perspectiva da realidade atual, podemos observar que cada vez mais a tecnologia está sendo a favor do crescimento dos estudos, se tornando uma demanda essencial. Objetivo deste trabalho é desenvolver um sistema que facilite o atendimento aos estudantes e colaboradores escolares, permitindo atividades dinâmicas e auxílio em suas atividades por meio de uma plataforma digital web. Realizamos uma pesquisa diretamente com alunos para saber qual era as maiores dificuldades no aprendizado e através dos resultados, construímos o nosso site. O sistema “Study+” traz comodidade e rapidez aos usuários que têm dificuldade de entender algum conteúdo ou matéria.

Palavras-chave: Perspectiva. Atendimento. Aprendizado

## **ABSTRACT**

From the perspective of current reality, we can observe that technology is increasingly being in favor of the growth of studies, becoming an essential demand. The objective of this work is to develop a system that facilitates service to students and school employees, allowing dynamic activities and assistance in their activities through a web digital platform. We conducted a survey directly with students to find out which were the biggest difficulties in learning and through the results, we built our website. The “study+” system brings convenience and speed to users who have difficulty understanding some content or subject.

**Keywords:** Perspective. Attendance. Apprenticeship.

# **1. INTRODUÇÃO**

A forma de aprendizado sempre foi maçante, por a dinâmica nunca existir nas salas de aulas. Grande parte dos alunos não se interessa pelas matérias e conteúdos dados pelos seus professores, por sempre só serem expostos nas lousas e nos livros escolares.

Utilizar recursos tecnológicos tornou-se tendência na sociedade atual e é forte aliado para os educadores se destacarem entre seus parceiros de trabalho, por seu ensino ser diferenciado.

O estudo online visa um olhar mais amplo aos conteúdos passados em sala de aula, dando uma credibilidade para o esforço dos professores que se preparam para dar suas aulas.

Por isso, investimos nossa ideia em uma plataforma de estudos, nosso objetivo é facilitar essas dificuldades existentes na educação.

## **1.1. OBJETIVO GERAL**

Desenvolver uma plataforma que ofereça um estudo mais eficaz, interativo e dinâmico que ajude na interação entre os alunos, pode upar apostilas sobre qualquer assunto, terá um fórum para trocar ideias com os professores e alunos, além de poder compartilhar links de vídeo aulas de outras plataformas, você também irá encontrar um sistema de quiz e ranking para disputar seus conhecimentos com outros alunos, além de diversas outras coisas.

### **1.1.1 OBJETIVOS ESPECÍFICOS**

- A. Auxiliar alunos;
- B. Conceituar as dificuldades do nosso público-alvo inicial;
- C. Analisar aplicativos semelhantes como referência de projeto;
- D. Requirir as soluções existentes no mercado;
- E. Melhorar o interesse estudantil;

## **1.2 JUSTIFICATIVA**

Os processos baseados em soluções tecnológicas se tornaram parte integrante das escolas que desejam acompanhar o desenvolvimento dos estudantes com dificuldade de aprendizado. Independente do segmento, um sistema colabora principalmente no crescimento e na organização de uma empresa, agilizando trabalhos operacionais repetitivos, por exemplo.

No caso das escolas, a existência de uma plataforma online automatizada com as ferramentas certas, possibilita aos donos focar melhor num serviço de qualidade e

proporcionar uma experiência diferenciada aos seus alunos e funcionários acadêmicos.

### **1.3. METOLOGIA**

Para desenvolver a ideia, tivemos que buscar algumas informações básicas do assunto no conceito do conhecimento, como o Kahoot, Classroom, a plataforma digital do teams, a ferramenta Canvas e YouTube estabelecer a necessidade do mundo atual. Atraído a atenção deles para sala virtuais, trazendo o interesse individuais e coletivos da maneira adequada possível.

### **1.4 ORGANIZAÇÃO DO TRABALHO**

Nossa equipe está organizada da seguinte forma

FullStack: Fernanda;

BackEnd: Ryan, Matheus;

FrontEnd: Jacson, Samara;

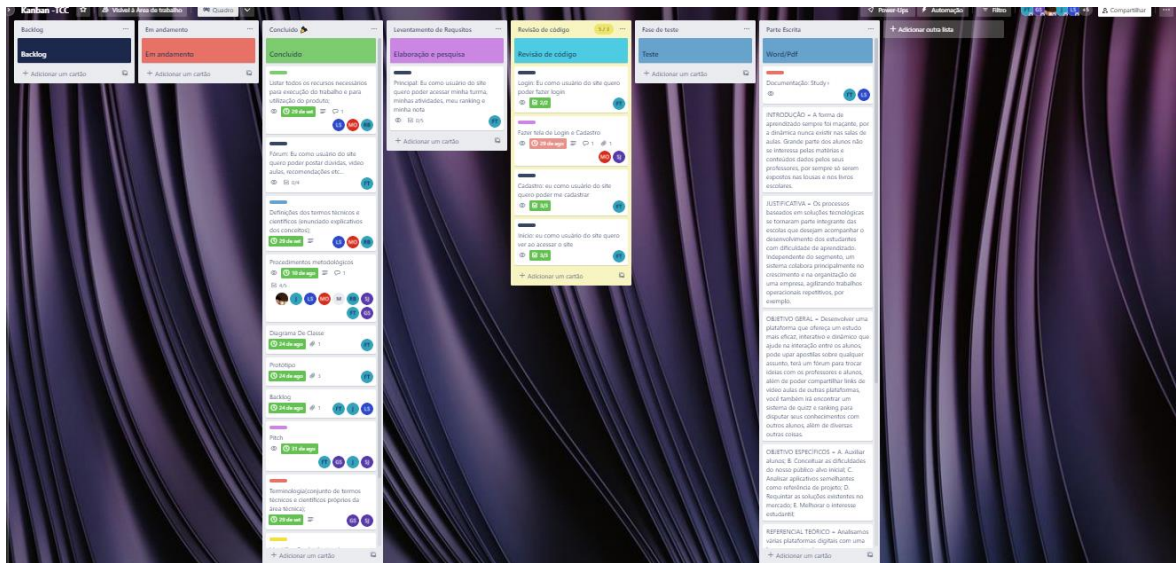

Banco de Dados: Geovana;

Documentação: Luana;

### **1.5 GERENCIAMENTO**

A equipe se organizou por meio de reuniões semanais e rastreamento de cada atividade executada. Para tal função, foi utilizada a plataforma Trello.

*Figura 0: Trello*

## 2 DESENVOLVIMENTO

Para o desenvolvimento do sistema, foi utilizado o Visual Studio Code. Para o banco de dados, utilizamos o XAMPP.

O Visual Studio Code é um editor de código-fonte, onde é possível utilizar diversos tipos de linguagens de programação para o desenvolvimento de páginas Web. Através do XAMPP, é possível simular um servidor web.

### 2.1 REQUISITOS FUNCIONAIS

- Acesso e cadastro de usuários: Na tela inicial, o usuário tem a opção de logar em sua conta ou cria-la, se não tiver;
- Tela Inicial: O site exibirá o quiz, sendo possível realizá-lo;
- Recuperação de senha: É possível solicitar a redefinição de senha de acesso do usuário;
- Responsividade: É possível utilizar o site em outros dispositivos.

### 2.2 REQUISITOS NÃO-FUNCIONAIS

- Ranking: Não é possível obter pontuação;

- Postagem: Não é possível postar dúvidas;
- Perfil: Não é possível editar o perfil.

## 2.3 DIAGRAMA

Desenvolvemos o diagrama para utilizarmos como guia durante o processo de desenvolvimento.

Figura 1: Diagrama

## 2.4 FLUXOGRAMA

Desenvolvemos o fluxograma para utilizarmos como guia durante o processo de desenvolvimento.

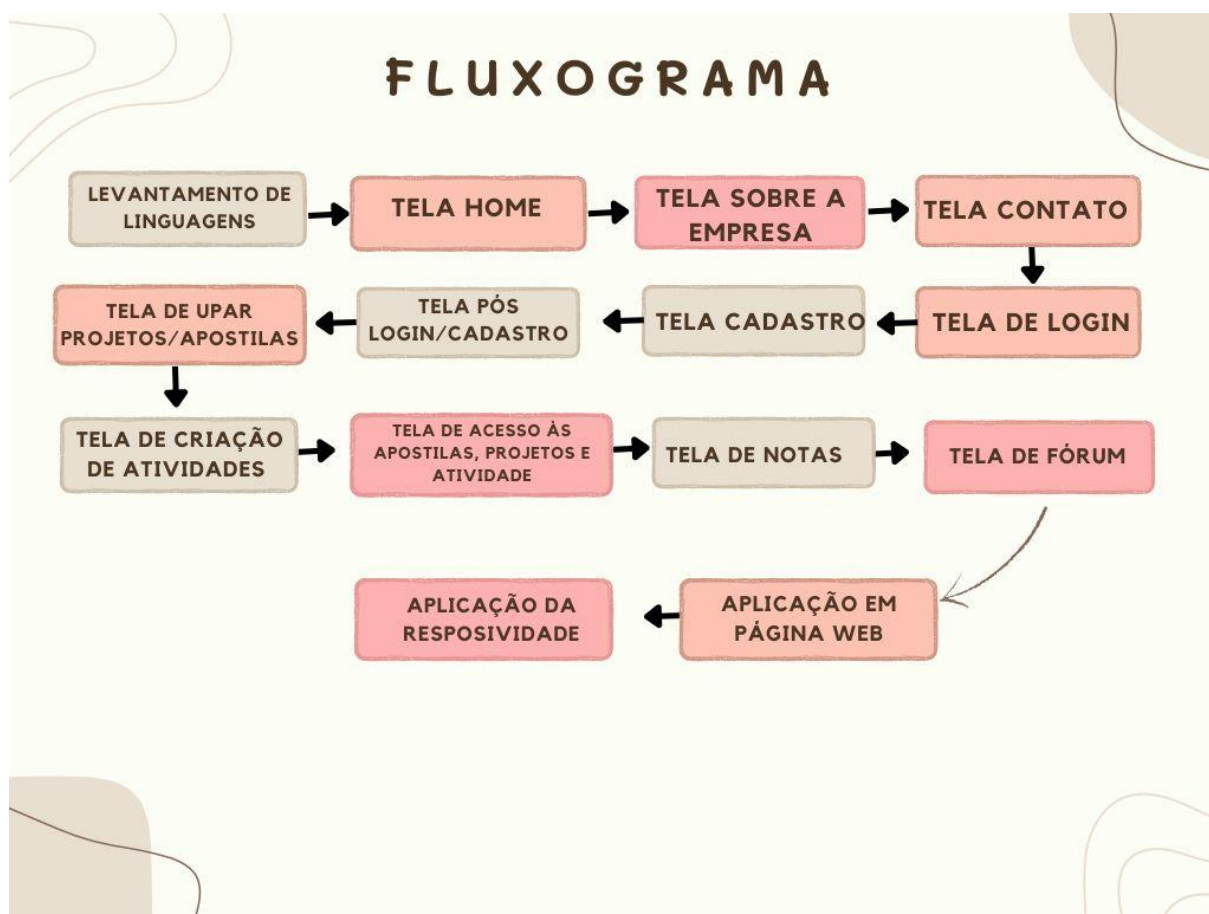

Figura 2: Fluxograma

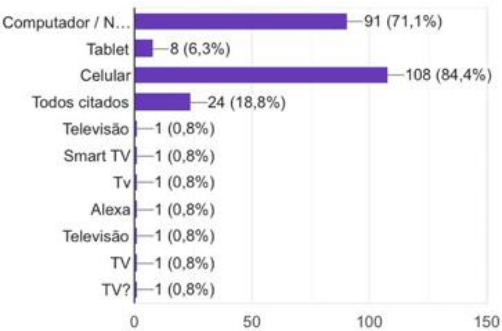

### 3. REFERENCIAL TEÓRICO

Analizamos várias plataformas digitais com uma base para entender um pouco melhor de como elas funcionam no mundo tecnológico, tivemos muitas dúvidas sobre o que os estudantes e professores pensão a respeito dos estudos e plataformas, onde fizemos pesquisas para saber como estava os estudos no Brasil após a pandemia. Por esse motivo criamos um formulário de perguntas e respostas, para receber as críticas dos professores e alunos, no intuito de ajudar a desenvolver as ideias.

Pesquisamos diversos modelos de web para dar uma inspiração, revemos os conceitos desses sites e pensamos no formato mais estratégico possível para

desenvolver o projeto. Dividimos as etapas para o desenvolvimento desse trabalho com muita dedicação e foco.

## CONCLUSÃO

O intuito deste trabalho foi compreender os principais problemas que alunos tiveram durante a Pandemia, desta forma, oferecer uma solução online para tal, a partir de pesquisas exploratórias para compreender o cenário atual que a pandemia deixou.

Desenvolvemos um site que permite auxiliar os alunos com dúvidas, fornecer atividades dinâmicas e auxiliares.

Com isso, a questão principal foi solucionada, buscando trazer da melhor forma o auxílio para aqueles que tem dificuldades.

Figura 10: Página de Perfil

The screenshot shows the 'Editar perfil' (Edit profile) form in the Study+ application. The form is displayed in a modal window. It includes a profile picture placeholder, a user name field (fefaa), an email field (molina.fefa@gmail.com), a new password field (Nova senha), and a confirm password field (Confirmar senha). The form is titled 'Editar perfil' and has 'Salvar' (Save) and 'Cancelar' (Cancel) buttons at the bottom.

## Perfil.php

```
